**16 California Physicians Move to Innovative Delivery Model from Concierge Choice Physicians**

*New physicians joined recently; growth highlights ongoing demand for a more personalized approach to healthcare*

**Rockville Centre, NY – May 24, 2018** – [Concierge Choice Physician](#) (CCP) announced today the addition of 16 physicians to its roster of concierge physicians in California representing primary care, internal medicine and several specialties, at locations ranging from major cities and suburbs to rural communities. The new practices join the existing 54 concierge programs already affiliated with CCP, increasing the company’s footprint by more than 30 percent in California.

“The growth we’ve experienced in California and other states highlights the ongoing frustration both physicians and patients have with today’s fragmented healthcare delivery system,” said Wayne Lipton, founder and CEO of CCP. Today’s physicians are burnt-out and patients are frustrated with a system that emphasizes efficiency over personalized care. We are honored to be able to provide a solution that works for everyone.”

CCP is the leading concierge management company that lets hospitals, medical groups and independent physicians choose the type of concierge program that is best for their practice and their patients. As the company that pioneered the [Hybrid Choice™](#) concierge program, CCP specializes in helping providers offer a blended model of concierge medicine within a physician practice to the small percentage of patients who want that option (typically under 10 percent), while they continue to see all other patients as before. The company also offers FullFlex™, which lets physicians transition to a complete concierge practice at the pace they feel comfortable (e.g., timing, number of patients).

Practices in California include:

**Concierge Choice Physicians New California Practices**
